**APX Speaker Microphones Offer Enhanced Audio Capabilities.**

These APX Remote Speaker Microphones and Public Safety Microphones have been designed to include the same speaker that is in the APX portable radio. These microphones deliver audio that is clearer, more intelligible and up to 50% louder than XTS-series RSMs.

The windporting feature dramatically lessens background noise from high winds and other severe weather conditions. The same technology prevents water from clogging the microphone port and distorting transmit audio, ensuring a user’s confidence of clear communication.

When a user speaks directly into a noise canceling remote speaker microphone, the noise-canceling acoustics utilize a directional microphone that is designed to eliminate ambient noise—ideal for outdoor communication.

* Intrinsically Safe: Motorola approved accessories are a critical part of the specific radio and accessory system certified by a recognized testing organization as intrinsically safe. Non-Motorola approved accessories are not certified as part of the overall Motorola APX system. Use of non-Motorola approved accessories could result in equipment that is unapproved or unsafe in a hazardous environment.

** Rugged accessories and batteries exceed industry standards (IPX7) for submersibility and provide a higher level of water protection—MIL-STD-810E, Method 512.3 Immersion. These accessories and batteries meet the incremental requirement of submersion in 1 meter of fresh water that is 27°C colder than the product.

**International Protection (IP) is a standard for rating dust and water protection. The first digit IPx or IPx represents increased levels of dust protection, while the second digit, IPx7 represents withstanding submersion in 1 meter of fresh water for 30 minutes. Rugged batteries exceed industry standards (IPx7) for submersibility and provide a higher level of water protection—MIL-STD-810E, Method 512.3 (Immersion). These batteries meet the incremental requirement of submersion in 1 meter of fresh water that is 27°C colder than the product for 2 hours.**
CHARGERS

IMPRES SINGLE UNIT CHARGER
Ensures maximum talk time and optimized battery cycle life. Automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. This is a compact, rapid rate, cost-effective charging solution. All APX radios and batteries are compatible with this charger.

IMPRES DUAL UNIT CHARGER
APX IMPRES Dual-Unit Chargers provide public safety personnel the convenience of a spare battery that is charged and ready to be used at all times. This dual pocket design allows simultaneous charging of primary and secondary batteries. This Next Generation IMPRES charger provides advanced features, including the ability to turn on/off reconditioning, reduced reconditioning time and improved energy efficiency. These rapid rate chargers are available with or without a display and are compatible with all APX radios and batteries.

IMPRES MULTI-UNIT CHARGER
Ensures maximum talk-time and optimized battery cycle life. Automatically reconditions IMPRES batteries based on actual usage, keeping them in peak condition. These rapid rate 6-unit chargers are available with or without a display. Display modules provide powerful analyzing information, such as current charge status and actual battery capacity in mAh. All APX radios and batteries are compatible with these chargers.

APX INSERTS FOR XTS CHARGERS
These inserts allow APX batteries to be charged the existing XTS IMPRES single unit and multi unit chargers.

IMPRES VEHICULAR CHARGER
The APX IMPRES vehicular charger has full IMPRES charger to battery communication capability. This ensures continuity of IMPRES battery charge data logging in a vehicular environment, so the IMPRES battery will receive adaptive, automatic reconditioning and will qualify for the 6-month capacity warranty extension.
NOTE: The IMPRES compatible vehicular charger will not recondition IMPRES batteries while in a vehicle, but it will provide an indication when reconditioning is required in an IMPRES desktop charger.
CHARGERS

APX TRAVEL CHARGER
Its small compact design allows the radio to be used while rapid charging in the charger base. Unit includes a voltage regulated vehicular charger adapter, custom charger base, mounting bracket and coil cord.

IMPRES BATTERY FLEET MANAGEMENT SOFTWARE
The software application remotely downloads key IMPRES battery data through existing IMPRES chargers for more effective management of the IMPRES battery and charger fleet. These reports provide key battery and charger data such as when IMPRES batteries are nearing end of life, identifying lost batteries and ensuring IMPRES chargers are appropriately distributed and use is maximized.

iMPreS battery reader
The industry exclusive IMPRES Battery Reader provides IMPRES battery users the ability to access charging, reconditioning and key usage data that can affect overall battery performance. By keeping batteries in peak condition, talk time and cycle life are optimized, reducing battery replacement. Package includes IMPRES Battery Reader, system software, USB cord and adapter inserts for APX, MOTOTRBO and Professional Series radios.
